ORDER'OF PUBLICATION.

FINAL SETTLEMENT.

NEVER-FAILING RELIEF

AFFORDED BY

SANFORD'S RADICAL CURE.

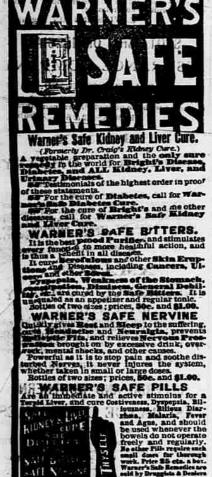

IT is a fact that can be substantisted by the most respectable testimonials ever offered in favor of any proprietary medicine, that the Radinal Curs you Caraks in does in every case aford instant and permanent relief. No matter of how long standing, or how sever that disease, the first does granding, or how sever that disease, the first does granding, or how sever that disease, the first does cannot be able to be a sever that the standing of the first does of the first does a standing of the sever that confidence is at once felt in its ability to do all that is claimed for it. The testimony of physicians, druggists, and patients is unanimous on this point, and the accumulating evidence is in point of respectability superior to any ever before obtained in favor of a popular remedy. The proprietors, therefore, may justly feel proud of the position this remedy has attained, and believe it worthy of its reputation.

10 YEARS A SUFFERER. From Hon. Theo. P. Bogert, Bristol, R.I. Messrs. Warks & Potters: Gentlemen, —Feeling oroughly convinced of the efficacy of Santoren's annoal. Currer for Cataring, I am induced to drop no a line to say that although I have been scepal of all the nostrums advertised as "radical res," I have never found anything that promises the relief and ultimate cure as that of Santonin's in have been seen affected with this dreadful disease or more than ten years, and not mult recently full of be induced to persevere with any until I ad the letter of Mr. Hener Wells, and can uthfully say that after using dive or six bottles I an thoroughly convinced of its curative propers. Hoping that others similarly afficied like yard will be induced to make the trial, I am, gunema, very truly, etc. THEO. P. HOGERT. BRISTOL, R. L., July 28, 1871.

Weekly Intelligencer. OFFICIAL COUNTY PAPER.

WHY ONLY ONE SIDE OF THE PAPER SHOULD BE WRITTEN UPON.

We believe we have once or twice explained in these columns the rea-son why publishers require that articles for papers shall only be written on one side of the paper, but neither explanation nor injunction will ever bring all people who send communiintended for printers, though more particularly to that for newspapers The reason for this is very simple, and it is that one compositor does not set up a whole article or book. If page 1 were given to compositor A, page 2 would go to compositor B, but how is it to go to him if page 2 is the case when it is written on both sides of the paper. Page 1 being laid

cooms, and he cuts it up into what The size of the "takes" depends on he speed with which it is desired that the article shall get into type, and also on the amount of copy the foreman has to given out, it being his object to keep as many hands busy as possible. And one can readily imagine the difficulty that would present itself to the foreman when he came to cut up an article and paste it together again in convenient "takes"

eject communications which they would be glad to print but which hey are not so desirous of printing as to have one side of every sheet

opied, as has to be done when such nanuscript is used at all. FISH CULTURE. [From the St. Louis Globe-Democrat.]

We do not know that we would gain anything directly by sending ur samples to Germany, but as the superiority of our methods would excite remark and stimulate inquiry home as well as abroad, we might in the end resp a reward in the growth of public interest in this nestion and the increased willingess of our legislative bodies to make the necessary appropriations or the artificial propagation of food fishes. Wonderful progress has been made in re-stocking waters partially or wholly depleted of fish in many of the northern states. Artificial propagation has been practised success ully for many years in the production of salmon and codfish in the New England states, and every spring nillions of the young of these species are turned out of the hatcherles into he bays that indent the eastern coast of Maine, Rhode Island, Massachusetts and Connecticut. Nor have the streams of that region been neglect-ed. Rivers and creeks that for gen-

The states bordering on the great takes have for years pursued a most liberal policy in the matter of fishing the same of the commerce and the matter of fishing an was crowded with the far-famed whitefish, but the eager demands of commerce and the untiring industry of the fishermen made such vast in roads upon the species that it was threatened with utter extinction. About five years ago, at the urgent solicitation of a few naturalists who saw the danger and its remedy, the Wisconsin legislature provided for the establishment of a fish hatchery of Milwaukee. Under competent mangement the institution has proved a great success, and every year from 10 000,000 to 20,000,000 of young whitefish are turned into Lake Michigan by the hatchers. Carctul observations show that the young fish thrive wonderfully, and it will not be long until the supply of commercial whitefish will be greater than

not so highly prized as its more delicate neighbor. Within the last two years the propagation of land-locked California salmon has been attended with gratifying success at the Millwauke hatchery, and it is thought that this valuable fish may become acclimatized in the waters of the Mississippi Valley.

In Michigan, Minnesota and Iowa, as well as Wisconsin, much attention has been paid to the propagation of has been need in my practice of the with provided and the cold-water streams of these states are gradually being stocked anew with that delicious fish. It has been found by expendented results, in this state that milk question. There is no other form of animal food fishes adapted to aur climates.

TINWARE.

It is growth its very rapid, but it is not so highly prized as its more delicate neighbor. Within the last two delicates at the Millwauke hatchery, and it is thought what the merchans are gyren in the that delicate in the waters of the last two dones are propagation of the first the methan of the first the methan of the first the methan of the state with that delicious files are gradually when the first the methan of the first them chains are given in the that delicious and the cold-water streams and small last would be successed at the Millwauke hatchery and in dealing with this question. in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by devangement of the stomach liver and edy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. Ayer's Pills are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for Constipation or Costiveness, Indiges-tion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy,

As a Dinner Pill they have no equal. While gentle in their action, these PILLS while gentle in their action, these Fills are the most thorough and searching catharjighthan be employed, and never give then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

cations to the newspapers into observing this simple and necessary rule which applies to all manuscript is written on the back of page 1, as

down, face upwards, page 2 is necessarily concessed from view and inac-This is however, the very simplest form of the inconvenience. As a matter of fact, the paging of the writer has very little to do with pages of the manuscript as given out to the printers. In a newspaper office an article goes directly into the hands of the foreman as it leaves the editorial

have it written on both sides. The cutting which would suit one side would entirely impair the writing on he other, and it would be simply im-

ossible to cut it up.
We do not know that the people who persist in ignoring so reasonable request as to write on only one side of the paper deserve to have the reasons for the request thus explained to to them; for the mere fact that, in ome way unknown to them, it does erve the convenience of the printers hould be sufficient to secure the ob- of a lawyer? rvance of the rule; but we suspect that a notion that this rule is one arbitrarily adopted by editors from a him and adhered to through habit has something to do with the frequent isregard of it by those unfamiliar with printing offices; hence we hope the explanation may be productive of some good among those who seem to nake it a matter of principle to dissuch disregard frequently causes authers : for it often causes them to

erations had been without fish have been re-stocked, and thus new and, with proper care, inexhaustible suplies of excellent food have been added to the resources of these states. The states bordering on the great course the denominational weeklies akes have for years pursued a most that are committed to the Third Term

be long until the supply of commercial whitefish will be greater than ever in Lake Michigan. The same | Susan B. Anthony says:-"Women natchery also turns out millions of want the comterts of life." And yet lake trout every year. This is a much nardier fish than the whitefish, and its growth is very rapid, but it is shoes, and she'll take the shees. not so highly prized as its more deli-cate neighbor. Within the last two
